## THE MEANING OF SHAZU & IT'S ORIGIN

Shazu is the name of our project & the ecosystem. We chose to be ninjas due to the origin and nature of ninjas. In the early centuries, ninjas were a group that were secret agents originating from Japan. Ninjas were known to dress in camouflaged attire as to best blend with their surroundings, as most of their work was done in the cover of night.

Our artwork is based off this culture as we believe crypto enthusiasts can relate to sometimes feeling like a ninja. We believe everyone has an inner Shazu, Shazu is welcome to everyone and can be represented by anyone.

The Shazu Ninja Collective (SNC) consists of 10,000 NFTs with 222 unique traits & 8 differential categories, 10 of them being legendary status which are of 1 of 1's hand-drawn. The Digital collectibles will live on the Ethereum blockchain and after the genesis mint, will be tradable on secondary markets such as Opensea.

## SHAZU TRAINING PACK EXPLAINED

Shazu comes with great game theory. With Shazu you don't just receive a profile picture. The genesis minters will receive a pack that will contain game theory elements in which they can grow in wealth and influence and generate passive income.

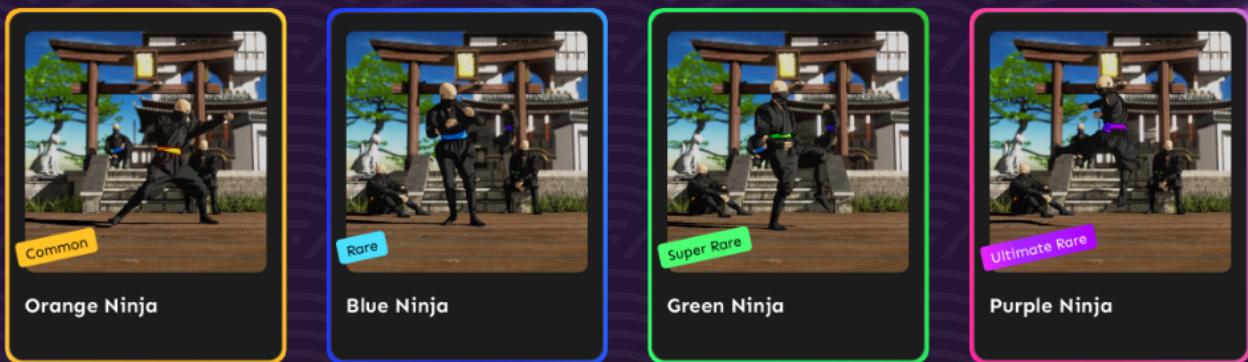

If you are a Genesis Minter, you will receive a "training pack" for our extended ecosystem which will include the following:

-  Profile Picture NFT (ETH)
-  Airdrop of Shazu Tokens (BSC)
-  Free Scratch Chances on our Game (3)
-  Shazu Action Cards (BSC)
-  Access to Exclusive Discord
-  Early access to Whitelist Spots for other NFT Projects

## GAME THEORY EXPLAINED

The genesis minter will be fully equipped into the SHAZU ecosystem from day one, with the training pack. Users can play a game, which is our own concept of S2M (Scratch 2 Mint). This part of the ecosystem will be on BSC to be efficient with gas fees and optimization. The goal of the game is to have 1 of each NFT Category:

These are called our action card collection and will live on the BSC blockchain as well as our own inbuilt marketplace. There is an unlimited supply of these NFTs, however they are deflationary and if a new action card collection releases, then the previous one becomes limited and hence rare.

If you want to BOOST your rewards you must collect 4 NFTs from playing the Scratch 2 Mint game.

Once you BOOST, you are now entitled to the shazu staking pool where you would receive more passive income in SHAZU tokens than just claiming BNBS. You would also need to stake your existing SHAZU tokens alongside the 4 Action Card NFTs. According to your staked SHAZU tokens, you will receive SHAZU tokens as rewards, once you decide to unstake your 4 Action Card NFTs, they will be burnt, and you may play the game again.

## NFT MARKETPLACE

In our in built NFT Marketplace, this is where you can trade your Action Card NFTs (BSC). The Shazu player will have two options. You can either post the NFT for sale in BNB or SHAZU. If a user decides to transact in BNB there will be a 2% tax. 1% will go to treasury, and the other 1% will be used to buyback and burn SHAZU tokens.

## REWARDS SYSTEM

SHAZU token will have a tax-for buy and sell in order to keep the ecosystem healthy:

**10%**

Buying Shazu Tax

BNB Claiming: **2%**

Reflection in SHAZU: **1%**

Treasury: **3%**

Shazu Boost Pool: **1%**

Liquidity Generator: **1%**

Buyback: **1%**

Buyback & Burn: **1%**

**18%**

Selling & Transferring Shazu Tax

BNB Claiming: **4%**

Reflection in SHAZU : **1%**

Treasury: **7%**

Shazu Boost Pool: **2%**

Liquidity Generator: **2%**

Buyback: **1%**

Buyback & Burn: **1%**

## TOKENOMICS ON SHAZU

There will be no presale or public sale for the SHAZU token, it will be a fair launch. All allocated tokens will be vested for twelve months, unlocked monthly. All tokens from the airdrop will be vested for twelve weeks, unlocked weekly.

# 2022

## ROADMAP

Q1

- Introduce SHAZU to the world via Social Media
- Give away whitelists to supporters of SNC NFT
- Collaborate with other NFT projects
- Presale of SNC NFT
- Public Sale of SNC NFT
- Introduce the SHAZU Token and list on Pancakeswap
- Introduce rewards of SHAZU token

Q2

- Shazu Scratch 2 Mint Game (Action Cards)
- In house Market Place for Action Cards (BSC)
- Introduce new aspects in our discord community for SNC NFT holders
- Provide early access to other NFT projects
- Provide utilities for holding a SNC NFT for our SHAZU ecosystem

Q3

- Marketing for our SHAZU token
- Marketing for SNC NFT
- Collaborate with other token projects
- Explore options of entering the Metaverse for SNC NFT
- Research, Build and Begin development of our Metaverse Ninja Game.
- Providing the community, the concept of our Ninja Game.

Q4

- Building the Metaverse Ninja Game for SHAZU
- Marketing for SHAZU Ninja Game
- Deploy beta of SHAZU Ninja Game
- Optimize SHAZU Ninja Game
